IBM Cloud Computing Fundamentals
IBM Cybersecurity Fundamentals
Red Hat Enterprise Linux Technical

PROFESSIONAL SUMMARY

Systems Analyst with six years of experience supporting enterprise and public-sector users across FIFA World Cup technology operations, Shared Services Canada, and the Ontario government. Hands-on work spans ITSM, endpoint lifecycle, cloud and infrastructure support, identity and access, Microsoft 365, Power Platform, and network troubleshooting. Experienced with ServiceNow, Intune, Autopilot, JAMF, Active Directory and Entra ID, Azure, PowerShell, Windows Server, VPN, DNS, and LAN/WAN environments.

EXPERIENCE

Systems Analyst

Dec 2023 - Present

FIFA World Cup 26, Toronto, ON

- Cut device onboarding from days to under an hour for 200+ users by standardizing zero-touch provisioning across Windows Autopilot, Intune, and JAMF.
- Sustained 24/7 availability for match-critical systems by supporting Windows Server, LAN/WAN, DNS, VPN, endpoint, and application-access incidents through ServiceNow.
- Reduced audit preparation effort by automating asset reconciliation and reporting with PowerShell and Git-tracked change control.
- Maintained asset assignment, decommissioning, vendor take-back, donation, and chain-of-custody records across the tournament hardware lifecycle.

Professional Development and Consulting

Jan 2023 - Dec 2023

Independent, Toronto, ON

- Completed cloud, cybersecurity, Linux, mainframe, and IT support credentials while undertaking limited consulting work for small businesses.

Systems Analyst / SharePoint Developer

Sep 2022 - Jan 2023

Shared Services Canada, Ottawa, ON

- Resolved 30+ daily requests across Power Apps, Power BI, SharePoint, and Microsoft 365 by investigating user needs, documenting fixes, and delivering enhancements.
- Kept business continuity plans executable by redesigning SharePoint structures and rebuilding Power Apps approval chains that users had been bypassing.
- Administered authentication, permissions, access controls, and audit records for departmental data under federal security and records requirements.

Systems Analyst

Sep 2021 - Sep 2022

Ministry of Public and Business Service Delivery, Oshawa, ON

- Resolved 20+ daily incidents across Active Directory, Azure, VPN, RAS, DHCP, mobile devices, and endpoint systems through BMC Remedy and Jira.
- Reduced repeat incidents by remotely diagnosing and remediating endpoints through Microsoft Endpoint Manager (Intune) and improving troubleshooting notes.
- Restored printer and network connectivity by diagnosing DNS and static IP failures with nslookup, Cntrl, and Teranet.

Systems Analyst

Jan 2017 - May 2021

Green Star, Toronto, ON

- Produced functional specifications, data models, and test plans for internal business systems while completing full-time undergraduate studies.

TECHNICAL SKILLS

ITSM and support: ServiceNow, BMC Remedy, Jira, ITIL-aligned incident and change processes, CMDB, SLA

Endpoint and identity: Intune, Autopilot, JAMF, SCCM, Active Directory, Entra ID, Windows, macOS, iOS, Android

Cloud and infrastructure: Azure, AWS, GCP, Windows Server, Citrix, VMware, Microsoft 365, SharePoint

Networking and security: Cisco routers and switches, GlobalProtect VPN, DNS, DHCP, LAN/WAN, FortiGate

Automation and data: PowerShell, Power Apps, Power Automate, Power BI, SQL, Excel
